</table>

**Notes:**
- Design and construction of partnership projects to reduce the risk of flooding along the San Jacinto River. Projects could include, but not limited to, detention, sediment control, vegetation management, and other flood risk management projects.
- Study will investigate flooding problems and identify potential solutions to flooding from the San Jacinto River.
- This project could reduce the risk of flooding and facilitate drainage improvements in the area of Atascocita in the San Jacinto River watershed.
- Potential partnership project with the City of Houston, Coastal Water Authority, and the State of Texas to permit, design, and complete dredging of the East Fork, West Fork and Lake Houston area waterways to reduce flooding risks.
- This project could reduce the risk of flooding and facilitate drainage improvements in the area east of Lake Houston in the San Jacinto River watershed.
- Study will investigate potential sites and benefits for detention in and around Glendale Dredge site in partnership with the City of Houston.
- Purchase of approximately 470 buildings.
- This project could reduce the risk of flooding and facilitate drainage improvements in the area of Huffman in the San Jacinto River watershed.
- This project could reduce the risk of flooding and facilitate drainage improvements in the area of Kingwood in the San Jacinto River watershed.
- Approximately 17 repair projects of erosion and infrastructure identified after Hurricane Harvey.
- Design and construction of these projects could reduce the risk of flooding for over 50 homes during a 1% rain or flood event.
- The project could reduce the risk of flooding for structures along tributaries of C106-00-00. Project will be coordinated with existing COH plans.
- Could reduce the risk of flooding and could improve local drainage issues for buildings along the channel. Project will be coordinated with existing COH plans.
- The project could reduce the risk of flooding for over 1,900 structures near C118-00-00 in the 1% floodplain. Project will be coordinated with existing COH plans.
