RE: Lake Houston Spillway Dam Improvement Project

Dear Lieutenant Governor Patrick:

I am writing today, on behalf of the Kingwood Community, to express our support for funding for the City of Houston's Lake Houston Spillway Dam Improvement Project. The City of Houston has secured \$48 million dollars from the federal government in addition to \$30 million dollars in local funds. Funding from the state for \$150 million dollars is currently part of Senate Bill 1 Article 11. This funding is needed for the completion of this community project that would bring much-needed flood relief to Lake Houston residents in the San Jacinto River watershed. Residents living in Kingwood and the Lake Houston area support the passage of this senate bill.

Hurricane Harvey flooded more than 16,000 homes and businesses in the Lake Houston area. Kingwood bore the brunt of this flooding. In the five and a half years since Hurricane Harvey devastated our community, Kingwood residents have worked with and supported the efforts of the City of Houston and Harris County Flood Control District to implement maintenance and capital projects that will prevent future flooding. Much has been done but additional projects are still needed. The Lake Houston Spillway Dam Improvement Project is one of those much needed projects.

The Lake Houston Spillway Dam was constructed prior to 1960. It was originally designed to hold water and provide reliable drinking water to over 6 million customers. Though not designed to serve as a flood control device, since Harvey its purpose has been shifted to assist in times of severe inclement weather. This is only a temporary measure to protect the community until the Lake Houston Spillway Dam Improvement project can be implemented. This improvement project is designed to be a permanent solution in the City of Houston's effort to prevent flooding in the Lake Houston Area.

The City of Houston is committed to on-going community engagement within the city and has conducted numerous public meetings for residents in the Lake Houston area. Kingwood participation was high and residents continue to voice support for conducting projects in our community that reduce the risk of flooding.

We appreciate your consideration and assistance in obtaining the state funding for this project. It will greatly benefit your constituents residing in the Lake Houston area.

Sincerely,

Dee M. Price  
President
